

Garcia-Barros, E. and Romo Benito, H. 2010. The relationship between geographic range size and life history traits: is biogeographic history uncovered? A test using the Iberian butterflies. – *Ecography* 33: 392–401.

Supplementary material

Appendix 1. Consensus tree topology adopted to calculate the phylogenetically independent contrasts. To improve compatibility with different tree-editing software, no blanks were introduced between the genus initial letter and the specific epithets. See sources and other details in the text.
