La Sorte, F. A. and Somveille, M. 2019. Survey completeness of a global citizen-science database of bird occurrence. – Ecography doi: [10.1111/ecog.04632](https://doi.org/10.1111/ecog.04632)

Supplementary material

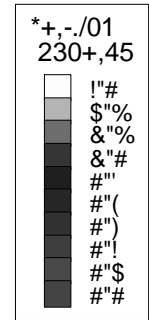

Figure A6. The duration of survey effort (hours) needed to achieve 5% survey completeness for bird assemblages calculated monthly. The bird occurrence information is from the eBird citizen-science database compiled daily within equal-area hexagon cells (49,811 km²) during the combined period 2002 to 2018.
