

Supplementary material

Table S1. Correlation matrix of simple linear regressions of tapeworm species richness versus five different measures of study effort: 1) occurrence data; 2) point data; 3) FishBase References; 4) ISI Web of Knowledge References (latin name + known synonyms); and 5) ISI Web of Knowledge ([4] + “Parasit* OR disease OR pathog*”).

Measure of study effort	r	p	n
1	0.283	<0.0001	306
2	0.273	<0.0001	306
3	0.518	<0.0001	313
4	0.538	<0.0001	316
5	0.709	<0.0001	316
