

Appendix 4: Supplementary material for the worked example

This appendix contains supplementary information (tables, figures) for the worked example.

Table A4.1. Explanatory variables: summary statistics for all 25×25 m grid cells in the study area (after Edvardsen et al. 2011).

Code	Variable	Minimum	Mean	Maximum
ALT	Altitude, derived from DEM (m a.s.l.)	0	104	324
DIA	Distance to nearest arable land (m)	0	158	6697
DIS	Distance to nearest road (m)	0	27	4729
SOE	Solar radiation, equinox (derived from the DEM)	0	9276	18509
SOS	Solar radiation, summer (derived from the DEM)	14974	26734	28687
SOW	Solar radiation, winter (derived from the DEM)	0	326	2733
TWI	Topographic wetness index	-4.69	-0.03	11.76
