

Ecography

**ECOG-02755**

Stern, N., Douek, J., Goren, M. and Rinkevich, B.  
2017. With no gap to mind: a shallow genealogy  
within the world's most widespread small pelagic fish.  
– Ecography doi: [10.1111/ecog.02755](https://doi.org/10.1111/ecog.02755)

**Supplementary material**

1 **Legends for supplementary material**

2 Table A1. List of examined material of putative species of subgenus *Sardinella* used  
3 for morphological comparisons.

4 Table A2. Information and references for the primers used through this study.

5 Table A3. Taxon sampling and accession vouchers for putative species of subgenus  
6 *Sardinella*, used in this study for phylogenetic and species delimitation analyses.

7 Table A4. Additional *COI* sequences of *Sardinella* mined from BOLD  
8 (BIN:AAB7268) and used in this study for the population structure and haplotype  
9 distribution analyses.

10 Table A5. Average genetic distances matrices (in %) for each gene partition.

11 Figure A1. Bayesian Inference (BI) phylogenetic tree for the geographical samples of  
12 subgenus *Sardinella*, employed from nuclear intron *S7* gene. BI significant values  
13 (>0.9) are displayed above nodes; Maximum Likelihood (ML) bootstrap support  
14 values below nodes (>80). Accession vouchers are summarized in table A3, except  
15 for *Sardinella hualiensis* which is indicated within the figure.

Table A1. List of examined material of putative species of subgenus *Sardinella* used in this study for morphological comparisons.
